The Detail

All the door panels in this range comprise of two uPVC skins, pressure bonded using 9mm MDF core material of E.H.D.F.R.A. polystyrene (extra high density fire retarded additive) using a specially formulated adhesive that is both heat and moisture resistant. They are also available in various colours to suite most homes and in a number of woodgrain effects.

All glass is toughened (Kitemark BS6206) and all door panels meet class 1 surface spread of flame classification BS476 part 7.

Due to the nature of the product, no liability can be accepted for the accuracy of colours or designs shown which are intended for guidance only.

All doors are available in white and a number of woodgrain finishes including mahogany, light oak and rosewood.

All glass is toughened (kite mark EN12150)

The result is a core free from CFCs and a skin that is approved to BS476: part 12 'Method of Test for Ignitability of Products by Direct Flame Impingement'.

This offers a high degree of thermal efficiency and, by using our range of reinforcing options, a high degree of security.

The Colours*

Black Brown Grain 012

Chartwell Green Grain 106

Anthracite Grey Grain 072

Irish Oak Woodgrain 145

Glazing Options

Stained Units

All stained units are individually hand made and may at times vary slightly from the computer generated brochure. If you do not see the design you would like in this brochure we would be happy to discuss your requirements.

Sandblasted / Etched Glass

This handcrafted glass is now produced using modern technology and is designed to give a traditional appearance. For a more dramatic effect this is often combined with striking glass bevels. Though generally obscure it does leave various areas clear.

Bevelled Glass

4mm shaped and polished glass facets, hand crafted and bonded to the glass with an optically clear resin then overlaid with lead.

Silver Grille

Our Silver Grille options feature attractive traditional motifs that are created using a highly polished chrome framework that is sealed within the double glazed units. Each Silver Grille design is available with a choice of backing glass.

Resin Bevel

Using the most advanced technology and manufactured under stringent quality controlled conditions this range of resin bevel effect designs has been introduced to complement our existing wide range of glass patterns. Resin bevels should not be confused with traditional bevels. Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable. Designs cannot be interchanged and are available in 24mm and 28mm thickness. The resin is glazed on the inside piece of glass facing outwards.

Coral Top Tips

Caring for your door is easy!

Clean your door about every four months with a non-abrasive cleaner to remove any grime and atmospheric deposits.

To clean your glass use a soft cloth with soap and water. Avoid excessive pressure when cleaning leaded glass.

Lubricate locks and hardware as required using a light machine oil. This will ensure your door continues to function smoothly and quietly.

Built to Last!

We have been manufacturing doors since 1990 and during this time have established a strong reputation for superior product quality and style. All our doors undergo rigorous testing to ensure they meet and exceed the latest building regulations.

When you purchase a Coral door you can rest assured you are investing in a quality product. Our company holds a BSI Kitemark for the installation and surveying of doors and is therefore independently audited to guarantee we never compromise on quality, so neither will you when you choose a Coral door.

The Perfect Finish

Our doors are available in various woodgrain colour effects. All woodgrain options are guaranteed not to crack, peel or fade*; so you can create the warmth that wood offers, without the hassle.

You also have the option of combining white and woodgrain finishes. So, for example you could have woodgrain on the outside to match the exterior features of your home, and white on the inside providing you with a neutral finish for your interior.

*10 Years

The Coral Fish. The fish lives in the Coral Reef and feels safe and secure. In nature the fish protects the Coral. In our hands the Coral Customer is safe and secure, in return the Customer gives life to Coral.
