WHEN THE CORAL ULTION LOCK DETECTS AN ATTACK IT GOES INTO

DOUBLE LOCK DOWN MODE

A HIDDEN ATTACK LOCK SECURES THE MECHANISM

Double

Anti Snap protection

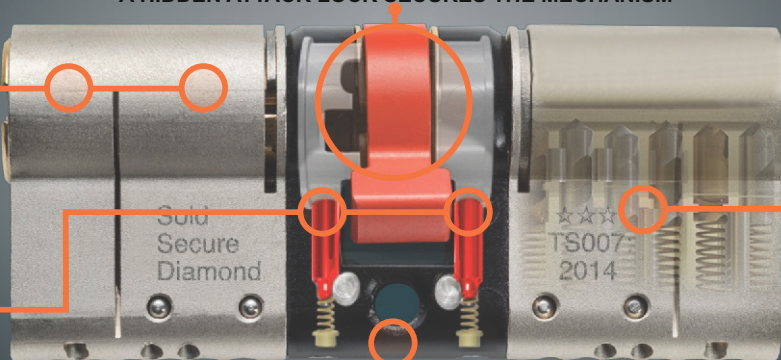

The intruder needs to snap Ultion twice before they see the core.

2

Attack locks

Lock still works from inside after an attack.

Two locking pins made from hardened stainless steel 630.

25%

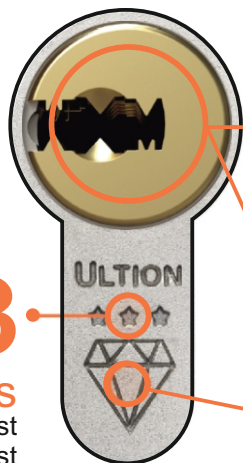

Denser than iron

The molybdenum core that houses the attack pins

20x

Drill Defences

Including Hardened Steel Rods, Pins & Plates.

3

Stars

The Highest TS007 test rating.

WXM™

Now even Stronger

The thicker key has enabled Ultion to introduce two additional pin lengths to the lower active pins, making the lock harder to pick.

Improved drill protection with 20 anti-drill points.

2 part plug moulded from molybdenum.

Sold Secure Diamond

The standard that most 3 star locks can't achieve.

The **WXM** shape was developed because it is symmetrical and as such creates a non-handed, 33% thicker key profile.

The new pin heights produce in excess of 260,000 working differs, more than doubling the maximum requirement for TS007 3* Grade 6.

If the cylinder is snapped and a burglar gains access through the ultion cylinder

Ultion will pay you

£2000

see T&C's on Ultions website

If an intruder burgles your home by snapping Ultion, Ultion will pay you £2000

Coral Ultion stays snap **secure** with the key left inside the lock.
Its something we all do, we lock the door and leave the key in the lock on the inside.

Even with the most secure snap locks, leaving the key in the lock can completely remove any snap protection you thought you had.

The only tool that opens a
Coral[™] **ULTION** locked door
